Talking OVER *our story*

As **Aldeko**, established in 2018, we proudly build upon a profound **40-year** legacy of excellence in the construction industry, pioneered by **Vikanshu Petrochem**. This deep-rooted experience has earned us a reputation as a trusted leader, contributing significantly to India's infrastructure development across diverse regions.

At **Aldeko**, we are committed to delivering innovative solutions that meet the dynamic needs of modern construction. Specializing in the production of high-performance Aluminium and Metal Composite Panels (ACP), WPC LOUVERS, ACRYLIC, WALL PANELS, SOFFIT, our premium products are engineered to redefine modern aesthetics and unlock new possibilities in architectural design. We offer unmatched versatility, superior durability, weather resistance, and stunning visual impact for both interior and exterior applications.

Our unwavering commitment to quality, sustainability, and exceptional customer care forms the bedrock of our operations. Each panel is meticulously crafted at our advanced manufacturing facility in Kotdwar, Uttarakhand, which adheres to stringent quality controls and relevant industry certifications. We also integrate sustainable practices throughout our production process to minimize environmental impact.

With a comprehensive distribution network and a dedicated support team, we provide seamless delivery and reliable service throughout India. Our extensive range of colors and finishes, offering from classic to contemporary, provides the versatility to bring any unique architectural vision to life.

Customer satisfaction is at the core of everything we do – your success is our success. Partner with **Aldeko**, and together, let's create something truly extraordinary.

Wabi Sabi

SERIES

More than a decorative style, Wabi Sabi is a philosophy of life; a way of living and perceiving the world, with the aim of peacefully accepting the natural cycle of growth and decay inherent in life.

At Aldeko Panels, we have created "Wabi Sabi" series that bring into homes simplicity and authenticity. It is about the aesthetic of things in existence that are "imperfect, impermanent and incomplete."

Wabi-sabi is a Japanese aesthetic and worldview that embraces the beauty of imperfection, impermanence, and the natural cycle of growth and decay. Rooted in Zen Buddhism, it encourages an appreciation of the transient and the imperfect, focusing on the understated, rustic, and authentic aspects of life.

Stone[®] SERIES

We all keep rolling in life, just as a stone keeps rolling down a hill. All that matters is to be as strong as a stone to stay motivated.

With this motive, Aldeko Panels has designed this stone series. Try this series in the interior of your house or even the exteriors of your corporate buildings. Lets bring a revolution in the industry of architectural decoration.

Sand SERIES

Sky above, sand below, peace within!
How about living life in the lap of nature, feeling its presence all over? You must be thinking, is that even possible? With Aldeko Panels, yes it is possible. The sand series of Aluminium panels allows you to give your house a sandy look that makes you feel like you are in the midst of sand every now and then.

A little History About ACP

Aluminium Composite Panels (ACP) were first introduced in 1969, marking the beginning of a revolutionary development in building materials. Over the years, their adoption witnessed an exponential rise as architects, fabricators, and building owners recognized their numerous functional benefits and the stunning design possibilities they offered.

This versatile material quickly became a favorite in the construction and design industries due to its lightweight structure, durability, and ability to achieve a sleek, modern aesthetic. ACP transformed the way buildings were conceived, allowing for innovative facades and creative architectural expressions that seamlessly combined form and function.

Aluminium Composite Panels (ACP), made of Aluminium Composite Material (ACM), are flat panels consisting of two thin coil-coated Aluminium Sheet bonded to a non-aluminium core. The pictorial reference on the left explain the core composition.
