ABOUT GROUP

With over 40 years of experience in the construction industry, VikanshuPetrochem has earned its reputation as a trusted leader, contributing significantly to infrastructure development across various regions. Established in 2018, Aldeko proudly upholds this legacy by providing innovative solutions designed to meet the dynamic needs of modern construction. Rooted in the strong foundation set by Vikanshu Petrochem, Aldeko is committed to innovation and excellence. Specializing in the production of Aluminum and Metal Composite Panels (ACP), we create premium products that inspire modern aesthetics and open up exciting possibilities for architectural design. At Aldeko, we place a strong emphasis on quality, sustainability, and exceptional customer care. Our materials are meticulously crafted to stand out and leave a lasting impression in any setting. We believe that outstanding projects require outstanding materials, which is why our advanced manufacturing facility in Kotdwar, Uttarakhand, ensures every product meets the highest quality standards. With a comprehensive distribution network and a dedicated support team, we provide seamless delivery and reliable service throughout India. Our extensive range of colors and finishes offers the versatility to bring your unique vision to life. Customer satisfaction is at the core of everything we do—your success is our success. Build better with Aldeko, and together, let's create something extraordinary.

Chairman's message

Aluminium composite panels are gaining in traction as an ideal adjunct for building materials. They are light, structurally rigid, colorful and easy to set up quickly. Exteriors and interiors can take on a uniform, beautiful look when such composite panels are used instead of other methods of cladding or covering.

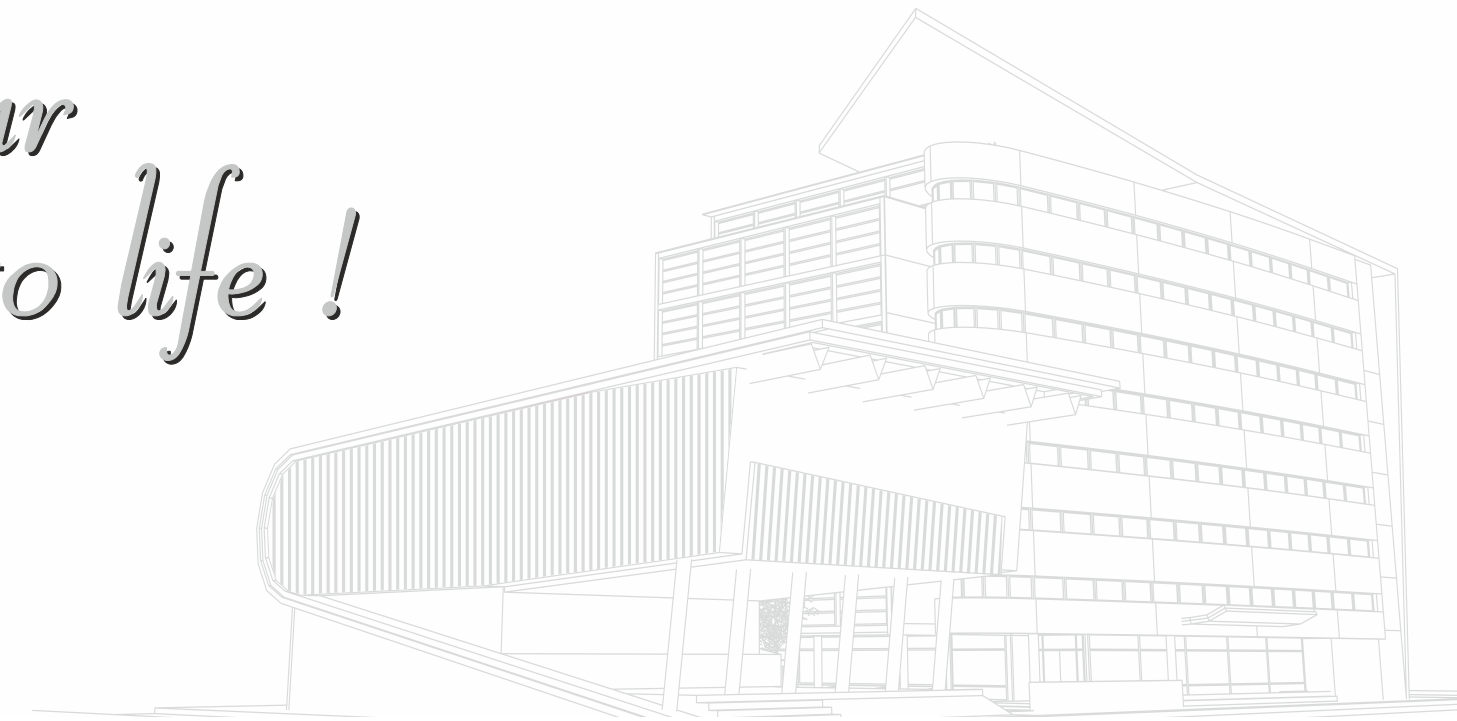

Aldeko is inspired by the heritage of its parent company Vikanshu Petrochem that has a stronghold in the construction industry with an experience of 40 years. Aldeko came into existence in year 2018 to introduce newer product as per the latest trends to cater to the clients with the same level of excellence and credibility.

Aluminium Composite panels offer a perfect solution to create wonderful aesthetics at a low price than natural stone and marbles and in record time. Signage is another area where composite panels prove their worth. Partitions can be set up in a day with these sandwiched panels.

The hub of sophistications

Believing in getting it right the first time and in investing in top technology, Aldeko set up its manufacturing facility of 50000 SQFT with a fully automated german technology line with 25 lac sq ft per month production capacity. Aldeko operates from its head office in Delhi but its state of art manufacturing facility is in Kotdwar, Uttarakhand.

The entire complex is well pre-planned to aid in manufacturing, in comfort and ease of working for employees and for precision quality control levels at each stage. the sandwiching and packing and dispatch processes are finely controlled by computerised control units with constant visual monitoring facility.

Quality

Each square meter of our product represents flawless perfection.

Aldeko's rise to leadership position in the ACP market and as a supplier of top import substitute product is primarily due to our extreme and fanatical attention to quality. Automation is key to consistency but it is overlaid with rigidly defined quality procedures. We are strict about the raw material we source. Aluminium coil rolls and other raw material receive a thorough check for metallurgical properties and for surface finish before being accepted for further process.

The next steps are the sandwich process, which in turn imparts the consistently beautiful finish. At each stage we have machine quality control, sampling tests and physical tests for consistency and performance across all defined parameters.
